Bank of Oklahoma

FULL TIME  Tulsa, Oklahoma  Published: 2020-09-08

Job Description

JOB TITLE
Consulting Technical Business Analyst

CATEGORY
Business Intelligence Analysts

Experience

Less than 5 years

Description

What You Can Expect:

We are in a growth mode of our products and services, with a focus on our long-term technology roadmap. We will provide the objectives, and you will work with your manager to develop a plan on how to get there. Long term, IT offers multiple career paths. You have the ability to become an expert in your space or develop a diverse background supporting various areas across the bank. The decision is yours.

Team Culture:

Our team is committed to delivering the best IT solutions for our lines of business. We collaborate with other IT members, as well as our business partners. It is a fast-paced, ever-changing yet fun environment with a number of new exciting initiatives.

The mission of IT is to Enable Business Success and Create Raving fans. We do this through our shared quest to continuously improve, while simultaneously looking at ways to optimize our applications and processes. We are a determined, smart, and collaborative group that is eager to welcome you to the team.

How You'll Spend Your Time:

- You will use your exceptional analysis and problem solving skills to support several critical applications.

- You will utilize your vast knowledge of troubleshooting to take on incidents and on call rotations.
- You will apply your business acumen to help facilitate meetings and provide solutions for complex projects.
- You will leverage your attention to detail to write functional business requirements and create reports from database repositories.
- You will be responsible for complex systems process analysis, design, simulation, testing, implementation, application configuration, and deployments.
- You will help mentor junior analysts as you are the most knowledgeable in your space.

We’d Like to Talk to You if You Have These Hard & Soft Skills:

ATTENTION TO DETAIL: You must be thorough and accurate in your data analysis and solicitation of requirements to provide the best information.

TECHNICAL SKILLS: Your experience with complex SQL queries, Oracle, and Unix will help set you up for success, as well as your ability to troubleshoot and create detailed documentation. Knowledge of IBM WebSphere and an understanding of network concepts, Mulesoft, and web services usage will be most helpful in this role.

COLLABORATIVE: You have an agile mindset and enjoy working in teams and across departments to achieve common goals.

RESULTS ORIENTED: You show initiative as you focus on the desired deliverables, while meeting and exceeding your goals.

PROBLEM SOLVER: You are able to track and solve complex problems in a variety of situations and function effectively in rapidly changing or uncertain conditions.

This level of knowledge is normally acquired through completion of a Bachelor’s Degree in Business, Computer Technology/Science, or a related field and 3–5 years experience in MIS or related field or 9–11 years of work related experience.
